Re: IPOS International Standards of Quality Cancer Care

I am pleased to report that the Canadian Association of Psychosocial Oncology is fully supportive of the IPOS International Standards of Quality Cancer Care and offer our endorsement of same. The development and implementation of standards of quality of cancer care that include psychosocial care are paramount to improving the quality of life for those affected by cancer. These standards of care are consistent with our vision of comprehensive cancer care that includes psychosocial interventions.

I have already forwarded an electronic copy of our logo to you office to use in conjunction with this endorsement. If you require further assistance please advise.

Regards,

Anthony Laycock
Association Manager
